ANSWER ALL THE QUESTIONS
Smart Electricity Billing System
Problem Statement: Ensure electricity usage is calculated and billed correctly.
Tasks:
1. Develop billing calculation logic
2. Write JUnit tests for tariff calculations
3. Implement CI/CD pipeline with automated testing
➢ Set up version control using GitHub
➢ Configure CI pipeline (e.g., Jenkins/GitHub Actions) to trigger on code commits
➢ Automate build process using Maven
➢ Integrate automated unit tests in pipeline
➢ Configure CD pipeline for automatic deployment to staging/production
4. Deploy services on Docker and Kubernetes
➢ Containerize application using Docker (write Dockerfile)
➢ Build and push Docker image to container registry (Docker Hub)
➢ Create Kubernetes deployment and service YAML files
